

### **Kalamare Beat Club release debut album!**

Friday the 27th October sees the release of Kalamare Beat Club's long-anticipated debut album on Wiretap Recordings.

The Stockholm-based quartet formed in the spring of 2002 and their agent-rock sound has since then found a loyal following on the Swedish live scene. Their demo's and ep's have also found a welcome home in rotation on Canadian and Japanese radio, whilst the band has received high praise from influential Swedish music sites and magazines, and figured in American music blogs.

### **The Smoking Gun...**

Idiosyncratic, filmic, multi-layered. Kalamare Beat Club's influences are rooted in rock, surf, electronica – and secret agent movies. Their eponymous full-length debut moves unimpeded between treacherous atmospherics, tinged with musical saw and melodica, to violent outbursts dominated by brutal guitars. The result is 39 minutes of pure instrumental drama.

The plot thickens. Before the mist clears we know someone's gonna get it in the neck...
